Intern Scholarship Program

As part of our DEI pledge, we are committed to increasing representation of historically underrepresented groups in our industry's talent pipeline.

We are pleased to offer two \$5,000 scholarships to interns each year. One Woman in Business and one Diversity in Finance scholarship will be awarded to two summer interns who demonstrate our core values of curiosity, ownership, trust and respect. The applications for these annual awards are evaluated and awarded by The Columbus Foundation each summer on our behalf using our established criteria, with preference given to women and historically underrepresented individuals in financial need.

Our goal is to help reverse the disproportional student loan debt gap and take action in supporting the long-term financial wellness and equity for underrepresented groups.

In our talent-driven business, interns play an important role in building our future firm. Our internship scholarship program helps ensure our firm has a growing share of diverse perspectives.

- Heather Brilliant, President and CEO
