Diamond Hill provides investment management services to individuals and institutional investors through mutual funds and separate accounts. DHCM claims compliance with the Global Investment Performance Standards (GIPS®). The International Composite is comprised of all discretionary, non-fee and fee-paying, non-wrap accounts managed according to the firm's International strategy, respectively, including those clients no longer with the firm. The strategy's investment objective is to achieve long-term capital appreciation by investing in non-US companies within the market capitalization range of the strategy that are selling for less than our estimate of intrinsic value. The MSCI ACWI ex USA Index measures the performance of large- and mid-cap stocks in developed (excluding the US) and emerging markets. The index is unmanaged, market capitalization weighted, includes net reinvested dividends, does not reflect fees or expenses (which would lower the return) and is not available for direct investment. Composite results reflect the reinvestment of dividends, capital gains and other earnings when appropriate. Net returns are calculated by reducing the gross returns by the highest stated fee in the composite fee schedule. Only transaction costs are deducted from gross of fees returns. Prior to 30 September 2022, actual fees were used in calculating net returns. All net returns were changed retroactively to reflect the highest fee in the composite fee schedule.
