DIAMOND HILL

INVESTED IN THE LONG RUN

Team

Aaron Monroe, CFA
Portfolio Manager

Kristen Sheffield, CFA, CIPM
Portfolio Specialist

Philosophy and Process Highlights

Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to always invest with a margin of safety
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

Portfolio Guidelines

- Typically 50–80 positions
- Maximum position size is 7%
- Top 10 holdings are typically greater than 25% of net assets
- Maximum industry exposure is 20%
- Maximum sector exposure is 30%

Market Capitalization

The portfolio typically invests in companies with a market capitalization below \$3 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell 2000 Index) at the time of purchase.

Top Ten Equity Holdings¹

	Sector	% of Net Assets
Red Rock Resorts, Inc. (CI A)	Cons. Discretionary	5.2

Bank OZK	-0.3	3.9
Astrana Health, Inc.	-0.3	4.1
UTZ Brands, Inc. (CI A)	-0.3	2.3

Margin of safety is a principle of investing in which an investor only purchases securities when their market price is significantly below their intrinsic value. In other words, when the market price of a security is significantly below your estimation of its intrinsic value, the difference is the margin of safety.

¹ Securities referenced may not be representative of all portfolio holdings. The reader should not assume that an investment in the securities was or will be profitable.

² Cash & Other may include cash, treasuries, money market funds and short duration fixed income funds.

Diamond Hill Capital Management, Inc. (DHCM) is an investment adviser registered with the Securities and Exchange Commission and a wholly owned subsidiary of Diamond Hill Investment Group, Inc.; registration does not imply a certain level of skill or training. DHCM provides investment management services to individuals and institutions through mutual funds, separately managed accounts, collective investment trusts, a private fund, a closed-end interval fund and other pooled vehicles including subadvised funds and model delivery programs. Policies for valuing investments, calculating performance and preparing GIPS reports, as well as a complete list and description of all composites, are available upon request. To receive a complete list and description of all Diamond Hill composites and/or a GIPS® report, contact Scott Stapleton at 614.255.3329, sstapleton@diamond-hill.com or 325 John H. McConnell Blvd., Suite 200, Columbus, OH 43215. A list of broad distribution pooled funds is available upon request. In addition, a list of limited distribution pooled fund descriptions is available upon request. The Small Cap Composite is comprised of discretionary, fee-paying, non-wrap accounts managed according to the firm's Small Cap equity strategy. The strategy's investment objective is to achieve long-term capital appreciation by investing in small capitalization companies selling for less than our estimate of intrinsic value. The composite typically invests in small capitalization companies with a market capitalization below \$3 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell 2000 Index) at the time of purchase. The composite results reflect the reinvestment of dividends, capital gains and other earnings when appropriate. Composite returns and benchmark returns are presented gross of withholding taxes on dividends, interest income and capital gains. Returns are calculated using US Dollars. Net returns are calculated by reducing the gross returns by the highest stated fee in the composite fee schedule. Only transaction costs are deducted from gross of fees returns. Prior to 30 September 2022, actual fees were used in calculating net returns. All net returns were changed retroactively to reflect the highest fee in the composite fee schedule. The Russell 2000 Index is the benchmark. This index measures the performance of roughly 2,000 US small-cap companies. The Russell 2000 Value Index is shown as additional information. This index measures the performance of US small-cap companies with higher price/book ratios and forecasted growth values. The indexes are unmanaged, market capitalization weighted, include net reinvested dividends, do not reflect fees or expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC.
