

DIAMOND HILL

INVESTED IN THE LONG RUN

2022 Capital Gain Estimates

All mutual funds must distribute to shareholders any net realized gains from the sale of individual securities in their portfolio. As a service to our mutual fund shareholders, Diamond Hill is communicating realized capital gain estimates for all of our mutual funds. Our communication includes each Fund's total per share factor of short term and long term realized gains and the total of these two figures as a percent of each Fund's net assets.

Distributions, whether reinvested or not, will be subject to federal and possible state income tax unless shares are held in a tax-free or tax-deferred retirement account. The per-share amount of the undistributed realized gain will be identical for all share classes.
