[See diamond-hill.com/disclosures for a full copy of the disclaimer.](https://diamond-hill.com/disclosures)

**Effective Duration** measures the interest rate risks of bonds with optionality, such as mortgage-backed securities (MBS), where the timing of principal repayment is highly dependent on interest rate levels.

**Weighted Average Life** is the average number of years each dollar of unpaid principal remains outstanding.

**Yield to Worst** is the lowest potential bond yield received without the issuer defaulting, it assumes the worst-case scenario, or earliest redemption possible under terms of the bond.

**Option-Adjusted Spread** is the difference between the portfolio yield and the risk-free rate, accounting for embedded options.

**Spread Duration** is the sensitivity of the price of a security to changes in its credit spread. The credit spread is the difference between the yield of a security and the yield of a benchmark rate, such as a cash interest rate or government bond yield.

Must be preceded or accompanied by a prospectus. The 30-day Yield represents net investment income earned by the fund over the previous 30-day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period.

30-day SEC Yields as of 30 November 2022 - Core Bond Fund: Investor 3.77%, Class I 4.51% and Class Y 4.52%.

**Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit [diamond-hill.com](https://diamond-hill.com). Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized.**

[View standardized performance.](#)

**Risk disclosure:** In general, when interest rates rise, fixed income values fall. Lower quality/high yield securities involve greater default risk or price changes than bonds with higher credit ratings. Mortgage- and asset-backed securities are influenced by factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties and become more volatile and/or illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or repay loans

***Carefully consider the Fund's investment objectives, risks and expenses. This and other important information are contained in the Fund's prospectus and summary prospectus, which are available at [diamond-hill.com](https://diamond-hill.com) or calling 888.226.5595.
