DIAMOND HILL

INVESTED IN THE LONG RUN

Team

Grady Burkett, CFA
Portfolio Manager

Krishna Mohanraj, CFA
Portfolio Manager

Tickers

Investor: DHIAX

Class Y: DHIYX

Class I: DHIIX

Philosophy and Process Highlights

Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to invest at a discount to intrinsic value
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

Portfolio Guidelines

- Typically 35–55 positions
- Maximum sector exposure is 35%
- Maximum single country exposure is 30%
- Maximum emerging market exposure is 40%

Market Capitalization

The portfolio typically invests in securities with a market capitalization of \$1 billion or greater.

Top Ten Equity Holdings

	Sector	% of Net Assets
Fairfax Financial Holdings Ltd.	Financials	4.0

Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit diamond-hill.com. Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized.

Risk disclosure: International investments involve special risks, including currency fluctuation, lower liquidity, different accounting methods, tax policies, political systems and higher transaction costs. These risks are typically greater in emerging markets. Small- and mid-capitalization issues tend to be more volatile and less liquid than large-capitalization issues. Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The quoted performance for the Fund reflects the past performance of Diamond Hill International Fund L.P. (the "International Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the International Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The International Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the International Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from 30 Dec 2016, the inception of the International Partnership and is not the performance of the fund. The assets of the International Partnership were converted, based on their value on 28 Jun 2019, into assets of the fund. The International Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes. The Morningstar Global Markets ex-US Index measures the performance of the stocks located in the developed and emerging countries (excluding the US) as defined by Morningstar. The index is unmanaged, market capitalization weighted, includes net reinvested dividends, does not reflect fees or expenses (which would lower the return) and is not available for direct investment. Index data source: Morningstar, Inc. See diamond-hill.com/disclosures for a full copy of the disclaimer.

³Securities referenced may not be representative of all portfolio holdings. Contribution to return is not indicative of whether an investment was or will be profitable. To obtain contribution calculation methodology and a complete list of every holding's contribution to return during the period, contact 855.255.8955 or info@diamond-hill.com.

⁴**Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the risk. **Standard Deviation** measures the volatility of a portfolio's returns. **Beta** measures a portfolio's sensitivity to market movements. **Sharpe Ratio** is the measure of risk-adjusted return of an investment portfolio. **Alpha** is the excess return of an investment relative to the index's return. **R-squared** represents the percentage of a portfolio's movements that can be explained by general market movements. **Up/Down Capture Ratio** is used to evaluate how well a portfolio performed relative to an index during periods when that index has risen/dropped. Statistics for periods less than one year are not annualized.
