## Philosophy and Process Highlights

We believe successful, long-term fixed income investing starts with small, individual security decisions.

- We look for undervalued securities and spread sectors that offer incremental yield and total return relative to the index.
- With a focus on securitized products, we have the potential to achieve higher credit quality while maintaining a yield advantage over government or corporate credit-focused strategies.
- We regularly look outside the benchmark for value-add opportunities.

## Portfolio Guidelines

The portfolio generally invests at least 80% of its assets in securitized bond investments. The portfolio may invest up to 15% of its assets in below-investment grade securities at the time of purchase and will typically maintain an average portfolio duration of one to two, with a maximum of three.

## Morningstar Ratings™

Class I Shares   Short-Term Bond	
Overall Rating <sup>3</sup>	★★★★★
Fee level <sup>4</sup>	Average

The Overall Morningstar Rating™ among 547 Short-Term Bond funds is derived from a weighted average of the risk-adjusted performance figures associated with its 3- and 5-year periods Morningstar Ratings as of 30 Jun 2022.

Carefully consider the Fund's investment objectives, risks and expenses. This and other important information are contained in the Fund's prospectus and summary prospectus, which are available at [diamond-hill.com](http://diamond-hill.com) or calling 888.226.5595. Read carefully before investing. The Diamond Hill Funds are distributed by Foreside Financial Services, LLC (Member FINRA). Diamond Hill Capital Management, Inc., a registered investment adviser, serves as Investment Adviser to the Diamond Hill Funds and is paid a fee for its services. **Not FDIC insured | No bank guarantee | May lose value**

<sup>1</sup> Cash & Other may include cash and money market funds. RMBS: Residential Mortgage-Backed Securities, CMBS: Commercial Mortgage-Backed Securities.

<sup>2</sup> Security quality ratings are derived from underlying portfolio securities by using the middle rating of Standard & Poor's, Moody's and Fitch. If only two of Standard & Poor's, Moody's and Fitch rates a security the higher of the two is selected. If only one of Standard & Poor's, Moody's and Fitch rates a security the available rating is used. For securities that are not rated by Standard & Poor's, Moody's or Fitch a rating from a secondary Nationally Recognized Statistical Rating Organization ("NRSRO") may be used. Ratings by any agency represent an opinion only, not a recommendation to buy or sell. Securities that are not rated by any agencies are reflected as Not Rated "NR."

<sup>3</sup> The Fund's Class I rating was 5 stars among 547 and 5 stars among 488 funds for the 3- and 5-year periods ended 30 Jun 2022. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star.

<sup>4</sup> The Morningstar Broad Fee Level data point compares the fund's prospectus adjusted operating net expense ratio to the prospectus adjusted operating net expense ratio of all the other funds within its Morningstar Category. **Risk disclosure:** In general, when interest rates rise, fixed income values fall. Lower quality/high yield securities involve greater default risk or price changes than bonds with higher credit ratings. Mortgage- and asset-backed securities are influenced by factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties and become more volatile and/or illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or repay loans sooner than expected, creating an early return of principal to loan holders.

The Bloomberg US 1-3 Year Government/Credit Index measures the performance of investment grade government and corporate bonds with maturities of one to three years. The index is unmanaged, includes net reinvested dividends, does not reflect fees or expenses (which would lower the return) and is not available for direct investment. Index data source: Bloomberg Index Services Limited. See [diamond-hill.com/disclosures](http://diamond-hill.com/disclosures) for a full copy of the disclaimer.

<sup>5</sup>The 30-day Yield represents net investment income earned by the fund over the previous 30-day period, expressed as an annual percentage rate based on the Fund's share price at the end of the 30-day period.

<sup>6</sup>**Key Rate Duration** measures the contribution to duration to the entire portfolio from each part of the yield curve. **Effective Duration** measures the interest rate risks of bonds with optionality, such as mortgage-backed securities (MBS), where the timing of principal repayment is highly dependent on interest rate levels. **Weighted Average Life** is the average number of years each dollar of unpaid principal remains outstanding. **Convexity** estimates how the effective duration of a portfolio changes as interest rates change. **Option-Adjusted Spread** is the difference between the portfolio yield and the risk-free rate, accounting for embedded options.
