Philosophy and Process Highlights

We aim to identify long positions that outperform the Russell 1000 Index and short positions that underperform the index. Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to invest at a discount to intrinsic value for long positions and at a premium to intrinsic value for short positions
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

Portfolio Guidelines

- A long-biased fund with typically 40-60 long positions and 25-50 short positions
- Total long positions are generally between 80-100% of net assets
- Total short positions are generally between 10-40% of net assets

Exposure Guidelines

- Maximum gross market exposure (long % + short %) = Up to 140%
- Target net market exposure (long % - short %) = 40-75%

Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit diamond-hill.com. Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized. Class I shares and Class Y shares include Investor share performance achieved prior to the creation of Class I shares and Class Y shares.

⁶Includes dividend expense relating to short sales. If dividend expenses relating to short sales were excluded, the Expense Ratio for the Long-Short Fund would have been 1.37% for Investor, 1.08% for Class I and 0.96% for Class Y.

The Russell 1000 Index measures the performance of roughly 1,000 US large-cap companies. The Russell 1000 Value Index measures the performance of US large-cap companies with lower price/book ratios and forecasted growth values. The Long-Short Fund Blended Index represents a 60/40 weighted blend of the Russell 1000 Index and the Bloomberg US Treasury Bills 1-3 Month Index. The Russell 1000 Index measures the performance of roughly 1,000 US large-cap companies. The Bloomberg US Treasury Bills 1-3 Month Index measures the performance of US Treasury bills with time to maturity between 1 and 3 months. The indexes are unmanaged, market capitalization weighted, include net reinvested dividends, do not reflect fees or expenses (which would lower the return) and are not available for direct investment.
