

All Cap Select Fund

(formerly Select Fund)

As of December 31, 2017

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. We seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality.
- Investments are sold when the stock price reaches our estimate of intrinsic value, our estimate of intrinsic value is revised such that there is no longer a discount to intrinsic value, a holding reaches our stated maximum position size, or to raise proceeds for a more attractive opportunity.
- More concentrated and broader market capitalization strategy.

PORTFOLIO MANAGEMENT

Portfolio Manager

Rick Snowden, CFA
Portfolio Manager

GROWTH OF \$10,000 SINCE INCEPTION¹

¹The chart represents a comparison of a hypothetical \$10,000 investment and the reinvestment of dividends and capital gains in Class I shares versus the benchmark(s). The Index is unmanaged and does not incur fees. The Fund's performance is before taxes and reflects the deduction of fees and expenses.

An investor should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contain this and other important information about the Fund(s) and are available at diamond-hill.com or by calling 888.226.5595. Please read the prospectus or summary prospectus carefully before investing. The Diamond Hill Funds are distributed by BHIL Distributors, LLC (Member FINRA). Diamond Hill Capital Management, Inc., a registered investment adviser, serves as Investment Adviser to the Diamond Hill Funds and is paid a fee for its services. Diamond Hill Funds are not FDIC insured, may lose value, and have no bank guarantee.

Large Blend

LIPPER CLASSIFICATION

Multi-Cap Core

Risk Disclosure: Because this Fund expects to hold a concentrated portfolio of a limited number of securities, a decline in the value of these investments would cause the Fund's value to decline to a greater degree than a less concentrated portfolio. There are specialized risks associated with small capitalization issues, such as market illiquidity and greater market volatility, than large capitalization issues.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized. Class Y shares include Class A share performance achieved prior to the creation of Class Y shares. These total return figures may reflect the waiver of a portion of a Fund's advisory or administrative fees for certain periods. Without such waiver of fees, the total returns would have been lower.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Russell 3000 Index is an unmanaged market capitalization-weighted index comprised of the 3,000 largest U.S. companies by total market capitalization. This index does not incur fees and expenses (which would lower the return) and is not available for direct investment.

⁴ **Key Definitions:** **Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the difference. **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized.
