

All Cap Select Composite

As of March 31, 2018

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. We seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality.
- Investments are sold when the stock price reaches our estimate of intrinsic value, our estimate of intrinsic value is revised such that there is no longer a discount to intrinsic value, a holding reaches our stated maximum position size, or to raise proceeds for a more attractive opportunity.
- More concentrated and broader market capitalization strategy.

Diamond Hill Capital Management Inc. (DHCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS Standards. DHCM has been independently verified for the period 5/31/00 - 12/31/17. DHCM's current verification firm is ACA Compliance Group. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. In addition the All Cap Select Composite has received a Performance Examination from 6/30/00 - 12/31/17. The verification and performance exam reports are available upon request. DHCM is a registered investment adviser and wholly owned subsidiary of Diamond Hill Investment Group, Inc.; registration does not imply a certain level of skill or training. DHCM provides investment management services to individuals and institutional investors through mutual funds, separate accounts, exchange traded funds and private investment funds. A complete list and description of all composites and policies for valuing portfolios, calculating and reporting returns, and preparing compliant presentations are available upon request. The All Cap Select Composite is comprised of discretionary fee paying non-wrap accounts managed according to the firm's All Cap Select equity strategy. The strategy's investment objective is to achieve long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value. The strategy typically invests in securities with a market capitalization of \$500 million or greater. The strategy's Adviser anticipates that each of the strategy's investments will also be held in one of the other Diamond Hill strategies. The composite results reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Composite returns and benchmark returns are presented gross of withholding taxes on dividends, interest income and capital gains. Returns are calculated using U.S. Dollars. Net returns are calculated by reducing the gross returns by either the actual client fee paid or the highest stated fee in the composite fee schedule, depending on the type of client and account, and are reduced by estimated accrued performance based fees where applicable. Only transaction costs are deducted from gross of fees returns. The Russell 3000 Index is the primary benchmark. This index is an unmanaged market-capitalization weighted index measuring the performance of the 3,000 largest U.S. companies based on total market capitalization. The Russell 3000 Value Index is shown as additional information. This index is an unmanaged market-capitalization weighted index measuring the performance of the broad value segment of the U.S. equity universe including those Russell 3000 Index companies with lower expected growth values. Our selection process may lead to portfolios that differ markedly from the benchmarks presented. Returns may be more volatile than, and/or may not be correlated to these indices, which are for comparative purposes only. The Firm's standard fee schedule for All Cap Select separate accounts is as follows: First \$20,000,000 = 0.85%; Over \$20,000,000 = 0.70%. The dispersion measure is the asset weighted standard deviation of the annual portfolio returns. Only portfolios represented in the composite for the entire year are included in the calculation. The calculation is not performed if the composite contains 5 or fewer accounts for the full year. No alteration of composites as presented here has occurred because of changes in personnel at any time. **Past performance is not a guarantee of future results.** The Global Investment Performance Standards are a trademark of CFA Institute. CFA Institute has not been involved in the preparation or review of this report/advertisement.
