Diamond Hill Short Duration Total Return Fund Commentary

As of March 31, 2018

All Fund returns based on Class I shares.

The Fund generated a 0.58% total return during the first quarter, compared to -0.20% for the Bloomberg Barclays U.S. 1-3 Year Government/Credit Index. Since its inception on July 5, 2016, the Fund has generated a total return of 3.56% compared to 0.11% for the Index. The goal of the Diamond Hill Short Duration Total Return Fund is to outperform the Index over a market cycle, while generating a yield and return advantage relative to the benchmark. We are pleased with how the Fund has performed on a relative basis, both in the most recent quarter and since its inception.

Volatility returned to the markets with a vengeance during the first quarter of 2018, spurred first by higher-than-expected wage growth reported for January (a 2.9% year-over-year increase compared to expectations of 2.6%) and then by on-and-off-again trade war rhetoric driven by statements from China and the United States. The quarter also saw the end of Janet Yellen's term as Federal Reserve chairwoman and the beginning of Jerome Powell's term, a transition that occurred smoothly. Chairman Powell continued the tradition of transparency from the Fed during his inaugural Humphrey Hawkins testimony to Congress. The Fed communicated its reluctance to infer that there would be any kind of "Powell Put"* as volatility spiked during the quarter. Both New York Fed President William Dudley and Chairman Powell made it clear that equity volatility would not influence federal funds rate management. First-quarter 2018 marks the first negative quarter for the Bloomberg Barclays U.S. Aggregate Index since the final quarter of 2016, when the markets were digesting the implications of the results of the U.S. election.

Much as it did in the preceding quarter, the yield curve continued to flatten during the first three months of 2018. Fueled by continued speculation surrounding the Federal Open Market Committee's (FOMC) plans to continue raising interest rates this year, the curve shifted higher throughout the quarter despite high levels of volatility. Specifically, the 1-year and 2-year Treasuries moved higher by 35 basis points and 28 basis points, respectively, while the longer end moved higher but at a reduced pace with the 10-year and 30-year increasing 33 basis points and 23 basis points, respectively.

It is important to note that the Short Duration Total Return Fund works to provide yield for investors while focusing on the shorter end of the fixed income markets. Though there is a concentration on the shorter end of the yield curve, the Fund maintains a certain level of interest rate risk and can experience some price volatility in uncertain markets. We believe there are opportunities to add incremental yield over the benchmark by investing in structured product across the quality spectrum. The Fund strives to maintain an average credit quality rating of A while taking advantage of mispriced opportunities in both unrated securities and a small allocation to below investment grade securities.

As of March 31, 2018, the Fund had a yield to worst (YTW) of 3.72% with an effective duration of 1.64, compared to the Index's YTW of 2.48% and effective duration of 1.92. Asset-backed securities (ABS) remain the largest allocation in the Fund and contribute the majority of the yield in the portfolio. Within the ABS sector, various subsectors were additive to performance, with automobile ABS the strongest contributor to performance during the quarter. Non-agency commercial mortgage-backed securities also contributed to the overall performance of the portfolio.

The Fund's allocation to corporate credit was slightly positive and the underweight position in financials and industrials contributed to relative performance as the entire corporate credit sector was negative during the quarter. The Fund has not invested in non-corporate credit (sovereign, supranational, etc.), and this did not impact performance during the quarter as these sectors offset each other with positive (local authority) and negative (sovereign, supranational) performance.

The Fund's minimal allocation to the U.S. Treasury sector (5.1%) contributed to relative performance as this component of the Index (62.1%) experienced negative returns during the quarter due to climbing rates on the shorter end of the curve.

The Fund continues to search for opportunities in the marketplace while maintaining an attractive yield relative to the benchmark.

DIAMOND HILL | FUNDS

PERIOD AND AVERAGE ANNUAL TOTAL RETURNS AS OF MARCH 31, 2018

	SINCE INCEPTION (7/5/16)	1-YR	YTD	1Q18	EXPENSE RATIO

*This phrase originated with the "Greenspan Put" following the equity market crash in October 1987. Greenspan garnered a reputation of adjusting the federal funds rate whenever the stock market dropped below a certain point, which encouraged movement into equities and created a theoretical floor on equity valuations. The Fed has historically added liquidity to the market in times of stress such as the Asian Financial Crisis, Long-Term Capital Management Crisis, Y2K, the 9/11 terrorist attacks, and the 2008 Financial Crisis. This pattern of providing liquidity created the perception that the Fed would continue to protect asset prices in a stressed environment.

Must be preceded or accompanied by a prospectus.

Risk Disclosure: The value of fixed-income securities varies inversely with interest rates; as interest rates rise, the market value of fixed-income securities will decline. Lower quality debt (ie: "High Yield") securities involve greater risk of default or price changes due to potential changes in the issuer's credit quality. The value of investments in mortgage-related and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or otherwise repay their loans sooner than expected, creating an early return of principal to holders of the loans.

The views expressed are those of the portfolio managers as of March 31, 2018, are subject to change and may differ from the views of other portfolio managers or the firm as a whole. These opinions are not intended to be a forecast of future events, a guarantee of results, or investment advice.

The performance data quoted represents past performance; past performance does not guarantee future results. *The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.*

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized. The returns at POP reflect the maximum sales charge applicable to each class. The maximum sales charge for A shares is 2.25%; I shares and Y shares have no sales charge.

Fund holdings subject to change without notice.

The Bloomberg Barclays U.S. 1-3 Yr. Gov./Credit Index is an unmanaged index of investment grade government and corporate bonds with maturities of one to three years.This index does not incur fees and expenses (which would lower the return) and is not available for direct investment.

An investor should consider the Fund's investment objectives, risks, and charges and expenses carefully before investing or sending any money. This and other important information about the Fund(s) can be found in the Fund's(s) prospectus or summary prospectus which can be obtained at diamond-hill.com or by calling 888.226.5595. Please read the prospectus or summary prospectus carefully before investing. The Diamond Hill Funds are distributed by Foreside Financial Services, LLC (Member FINRA). Diamond Hill Capital Management, Inc., a registered investment adviser, serves as Investment Adviser to the Diamond Hill Funds and is paid a fee for its services.
