

Market Commentary

After one of history’s sharpest and quickest market declines in Q1, an unprecedented amount of government stimulus and the beginnings of an economic rebound as the world began reopening drove one of the sharpest equity market rebounds ever seen. The Russell 3000 Index returned 22.0% in Q2—its best quarter in history. As of June 30, the index was down just 3.5% for the year.

Technology-related stocks were again the most notable contributors to market returns in Q2. Many of these businesses will likely see minimal long-term impact from COVID-19, with some potentially coming out of it in a better competitive position. Combined with generally strong balance sheets and attractive growth rates, these businesses seem to have safe-haven status in the minds of many investors. Five of these stocks—Apple, Microsoft, Amazon, Facebook and Alphabet—contributed one-quarter of the broader market’s Q2 return. The consumer discretionary sector performed best, driven by Amazon’s 41.5% increase, while 43.8% and 29.4% returns for Apple and Microsoft, respectively, were responsible for a large portion of the information technology sector’s continued outperformance.

After a significant Q1 decline, the energy sector bounced back significantly in Q2. Oil prices plummeted earlier this year as demand cratered, causing producers to take supply offline. As economies started reopening in Q2 and demand slowly began returning, oil prices rebounded 92%—driving the sector 32.4% higher. Still, the sector is by far the worst performing year-to-date, down more than 36%.

Defensive sectors lagged in Q2, with consumer staples and real estate increasing 9.2% and 13.5%, respectively, and utilities eking out a 2.4% return.

RUSSELL 3000 INDEX SECTOR RETURNS - 2Q20

Source: FactSet.

Related to the strong performance of technology companies, growth stocks more broadly continued to dominate value stocks, with the Russell 3000 Growth Index’s 28.0% return nearly doubling the value index. Value did have a three-week stretch of outperformance starting May 15, but it didn’t last. Value gave back that outperformance and then some starting in mid-June as COVID-19 cases began to accelerate in many parts of the country. As concerns of a second wave grew, investors reverted back to the perceived safety of large-cap growth stocks.

Small cap stocks, however, reversed their recent trend of underperformance, with the Russell 2000 Index’s 25.4% return beating the Russell 1000 Index return by 360 basis points. This is the largest magnitude by which small caps have outperformed large caps since Q2 2018—though it’s only a small dent in large cap stocks’ multi-year outperformance.

The strength of the market rally has surprised us, since the economic and earnings outlook is still highly uncertain. Stock prices are not far from the levels seen at the beginning of the year, particularly for large caps, and valuations do not appear to discount a meaningful probability of an economic setback from a second wave of COVID-19. That said, the unprecedented amount of government stimulus—and a willingness to do more if necessary—continues to be supportive of markets.

Looking ahead, we anticipate most businesses to report declines in sales and earnings; however, those with a more variable cost structure should be able to protect margins and earnings better than those with greater fixed costs. We have been focused on assessing businesses' cost structures and how the associated operating leverage may impact near-term cash flows. In addition, we have been closely examining companies' balance sheets and liquidity situations to assess their ability to weather the downturn.

We remain focused on individual business analysis, comparing price and value, and prudently using volatility to take advantage of opportunities the market presents, all while attempting to minimize the potential for permanent impairments of client capital.

Large Cap Concentrated Strategy Review

The Composite increased 16.72%, net of fees, during the quarter, compared to a 21.82% increase in the Russell 1000 Index and a 14.29% increase in the Russell 1000 Value Index.

On an absolute basis, all sectors contributed to return, led by the financials, communication services and consumer discretionary sectors.

The Composite's underperformance relative to the Russell 1000 Index was primarily driven by security selection and an underweight position in the information technology sector. Overweight positions in the financials and consumer staples sectors and unfavorable security selection in the consumer discretionary and health care sectors also detracted from relative return. A lack of exposure to the utilities sector was the largest contributor to relative return.

Best Performers

- Social media company **Facebook, Inc. (CI A)**
- Health care products manufacturer **Abbott Laboratories**
- Global automotive supplier **BorgWarner, Inc.**
- Media and technology company **Alphabet, Inc. (CI A)**
- Banking and financial services company **Citigroup, Inc.**

Worst Performers

- Elevator and escalator manufacturer **Otis Worldwide Corp.**
- Financial services technology company **Fidelity National Information Services, Inc.**
- Diversified holding company **Berkshire Hathaway, Inc. (CI B)**

Diamond Hill Capital Management Inc. (DHCM) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Diamond Hill Capital Management Inc. (DHCM) has been independently verified for the periods 5/31/00 – 3/31/20. DHCM's current verification firm is ACA Compliance Group. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. In addition the Large Cap Concentrated Composite has received a Performance Examination from 12/31/11 – 3/31/20. The verification and performance exam reports are available upon request. DHCM is a registered investment adviser and wholly owned subsidiary of Diamond Hill Investment Group, Inc.; registration does not imply a certain level of skill or training. DHCM provides investment management services to individuals and institutional investors through mutual funds and separate accounts. A complete list and description of all composites and policies for valuing portfolios, calculating and reporting returns, and preparing compliant presentations are available upon request. The Large Cap Concentrated Composite is comprised of discretionary fee paying non-wrap accounts managed according to the firm's Large Cap Concentrated equity strategy. The strategy's investment objective is to achieve long-term capital appreciation by investing in large capitalization companies selling for less than our estimate of intrinsic value. Holdings are derived from holdings in the Diamond Hill Large Cap strategy. The Large Cap strategy typically invests in large-capitalization companies, which are defined as companies with a market capitalization of \$5 billion or greater. However, the Large Cap strategy can invest in companies with a market capitalization as low as \$2.5 billion. The Composite results reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. Composite returns and benchmark returns are presented gross of withholding taxes on dividends, interest income and capital gains. Returns are calculated using U.S. Dollars. Net returns are calculated by reducing the gross returns by either the actual client fee paid or the highest stated fee in the Composite fee schedule, depending on the type of client and account, and are reduced by estimated accrued performance based fees where applicable. Only transaction costs are deducted from gross of fees returns. The Russell 1000 Index is the primary benchmark. This index is an unmanaged market-capitalization weighted index measuring the performance of the 1,000 largest companies, on a market capitalization basis, in the Russell 3000 Index. The Russell 1000 Value Index is shown as additional information. This index is an unmanaged market-capitalization weighted index measuring the performance of the large cap value segment of the U.S. equity universe including those Russell 1000 Index companies with lower expected growth values. The Russell 3000 Index is an unmanaged market-capitalization weighted index measuring the performance of the 3,000 largest U.S. companies based on total market capitalization. Our selection process may lead to portfolios that differ markedly from the benchmarks presented. Returns may be more volatile than, and/or may not be correlated to these indices, which are for comparative purposes only. The Firm's standard fee schedule for Large Cap separate accounts is as follows: First \$20,000,000 = 0.65%; Over \$20,000,000 = 0.55%. The dispersion measure is the asset weighted standard deviation of the annual portfolio returns. Only portfolios represented in the Composite for the entire year are included in the calculation. The calculation is not performed if the Composite contains 5 or fewer accounts for the full year. No alteration of composites as presented here has occurred because of changes in personnel at any time. **Past performance is not a guarantee of future results.** It should not be assumed that an investment in the securities
