Vision

At Diamond Hill, our goal is to be an exceptional active investment boutique that our clients trust to deliver excellent long-term investment outcomes from a team aligned with their success.

VALUE

We recognize that market price and investment value are independent in the short term but tend to converge over time.

LONG TERM

We maintain a long-term focus both in investment analysis and management of our business.

DISCIPLINE

We invest with discipline to increase potential return and protect capital.

ALIGNMENT

We treat every investment as a partial ownership interest in that company and align our interests with our clients through significant personal investment in our strategies.

DIAMOND HILL FUNDS

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. We seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality.
- Investments are sold when the stock price reaches our estimate of intrinsic value, our estimate of intrinsic value is revised such that there is no longer a discount to intrinsic value, a holding reaches our stated maximum position size, or to raise proceeds for a more attractive opportunity.

PORTFOLIO GUIDELINES

Fund Guidelines

- Typically 50-80 positions
- Maximum sector exposure is 30%

Market Capitalization

The Fund typically invests at least 80% of its net assets in small capitalization companies, defined as those companies with a market capitalization below \$3.0 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell 2000 Index) at the time of purchase.

Risk Disclosure: There are specialized risks associated with small capitalization issues, such as market illiquidity and greater market volatility, than large capitalization issues.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized. Class I shares include Class A share performance achieved prior to the creation of Class I shares.

Fund holdings, sector allocations, and portfolio statistics subject to change without notice.

The Russell 2000 Index is an unmanaged market capitalization-weighted index comprised of the smallest 2,000 companies by market capitalization in the Russell 3000 Index, which is comprised of the 3,000 largest U.S. companies by total market capitalization. The Russell 2000 Value Index is an unmanaged market capitalization-weighted index measuring the performance of the small cap value segment of the U.S. equity universe including those Russell 2000 Index companies with lower expected growth values. These indices do not incur fees and expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. See diamond-hill.com/disclosures for a full copy of the disclaimer.

⁴ **Key Definitions:** **Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the difference. **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized. Risk statistics are relative to the Russell 2000 Index.

⁵ The Russell 2000 Index is the core benchmark. The Russell 2000 Value Index is the value benchmark.

The higher the active share, the greater the difference. **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized. Risk statistics are relative to the Russell Midcap Index.

⁶ The Russell Midcap Index is the core benchmark. The Russell Midcap Value Index is the value benchmark.

Large Cap Fund

As of June 30, 2020

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. We seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality.
- Investments are sold when the stock price reaches our estimate of intrinsic value, our estimate of intrinsic value is revised such that there is no longer a discount to intrinsic value, a holding reaches our stated maximum position size, or to raise proceeds for a more attractive opportunity.

Risk Disclosure: Overall equity market risks may affect the value of the fund.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized. Class I shares include Class A share performance achieved prior to the creation of Class I shares.

Fund holdings, sector allocations, and portfolio statistics subject to change without notice.

The Russell 1000 Index is an unmanaged market capitalization-weighted index comprised of the largest 1,000 companies by market capitalization in the Russell 3000 Index, which is comprised of the 3,000 largest U.S. companies by total market capitalization. The Russell 1000 Value Index is an unmanaged market capitalization-weighted index measuring the performance of the large cap value segment of the U.S. equity universe including those Russell 1000 Index companies with lower expected growth values. These indices do not incur fees and expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. See diamond-hill.com/disclosures for a full copy of the disclaimer.

LIPPER CLASSIFICATION

Multi-Cap Value

Risk Disclosure: Because this Fund expects to hold a concentrated portfolio of a limited number of securities, a decline in the value of these investments would cause the Fund's value to decline to a greater degree than a less concentrated portfolio. There are specialized risks associated with small capitalization issues, such as market illiquidity and greater market volatility, than large capitalization issues.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized. These total return figures may reflect the waiver of a portion of a Fund's advisory or administrative fees for certain periods. Without such waiver of fees, the total returns would have been lower.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Russell 3000 Index is an unmanaged market capitalization-weighted index comprised of the 3,000 largest U.S. companies by total market capitalization. The Russell 3000 Value Index is an unmanaged market capitalization-weighted index measuring the performance of the broad value segment of the U.S. equity universe including those Russell 3000 Index companies with lower expected growth values. These indices do not incur fees and expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. Risk Disclosure: The Fund invests in non-U.S. securities. Investing in non-U.S. securities may entail risk due to foreign economic and political developments; this risk may be higher when investing in emerging markets. Changes in currency exchange rates and differences in accounting and taxation policies outside the U.S. can raise or lower returns. There are specialized risks associated with small capitalization issues, such as market illiquidity and greater market volatility, than large capitalization issues.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

The quoted performance for the Fund reflects the past performance of Diamond Hill Global Fund L.P. (the "Global Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the Global Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The Global Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the Global Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 31, 2013, the inception of the Global Partnership and is not the performance of the fund. The assets of the Global Partnership were converted, based on their value on December 29, 2017, into assets of the fund. The Global Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Morningstar Global Markets Index is a net total return index designed to provide exposure to the top 97% of equity market capitalization in both developed and emerging markets. This index does not incur fees and expenses (which would lower the return) and is not available for direct investment. Index data source: Morningstar, Inc. See diamond-hill.com/disclosures for a full copy of the disclaimer.

³ **Key Definitions:** **Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the difference. **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized. Risk statistics are relative to the Morningstar Global Markets Index.

Risk Disclosure: The Fund invests in non-U.S. securities. Investing in non-U.S. securities may entail risk due to foreign economic and political developments; this risk may be higher when investing in emerging markets. Changes in currency exchange rates and differences in accounting and taxation policies outside the U.S. can raise or lower returns. There are specialized risks associated with small capitalization issues, such as market illiquidity and greater market volatility, than large capitalization issues.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

The quoted performance for the Fund reflects the past performance of Diamond Hill International Fund L.P. (the "International Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the International Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The International Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the International Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 30, 2016, the inception of the International Partnership and is not the performance of the fund. The assets of the International Partnership were converted, based on their value on June 28, 2019, into assets of the fund. The International Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Morningstar Global Markets ex-U.S. Index is a net total return index designed to provide exposure to the top 97% market capitalization in each of two economic segments, developed markets, excluding the United States, and emerging markets. This index does not incur fees and expenses (which would lower the return) and is not available for direct investment. Index data source: Morningstar, Inc. See diamond-hill.com/disclosures for a full copy of the disclaimer.

² **Key Definitions:** **Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the difference. **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized. Risk statistics are relative to the Morningstar Global Markets ex-U.S. Index.

³ The holdings identified do not represent all of the securities purchased, sold, or recommended for the adviser's clients. The reader should not assume that an investment in the securities identified was or will be profitable. To obtain the contribution calculation methodology and a complete list of every holding's contribution to the overall portfolio's performance during the measurement period, contact 855.255.8955 or info@diamond-hill.com.

Long-Short Fund

As of June 30, 2020

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than and shorting companies selling for more than our estimate of intrinsic value.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. For long positions, we seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality. The inverse is often true for our short positions.
- Seek to add value through stock selection on both long and short positions.
- The strategy maintains a long-bias; however the short positions reduce net exposure and therefore tend to reduce volatility compared to long-only funds.

Research Opportunities Fund

As of June 30, 2020

OBJECTIVE

Long-term capital appreciation by investing in companies selling for less than and shorting companies selling for more than our estimate of intrinsic value. Flexible mandate includes international and fixed income investments.

INVESTMENT STRATEGY

- To estimate intrinsic value, the business must be understandable, and we must be able to reasonably forecast its cash flows. For long positions, we seek businesses with sustainable competitive advantages, conservative balance sheets, and management with an ownership mentality. The inverse is often true for our short positions.
- Seek positive total returns on both long and short positions.

TEAM

The Research Opportunities Fund is co-managed by Diamond Hill Research Analysts, each of whom is responsible for a sleeve of securities within one of five sector teams.

GROWTH OF \$10,000 SINCE INCEPTION¹

The ICE BofA U.S. T-Bill 0-3 Month Index is comprised of U.S. dollar denominated U.S. Treasury Bills with a term to maturity of less than 3 months. These indices do not incur fees and expenses (which would lower the return) and are not available for direct investment.

⁶ **Risk Statistic Definitions:** **Standard Deviation** measures the volatility of the Fund's returns. **Beta** measures the Fund's sensitivity to market movements. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. **Alpha** measures excess return relative to the market that is attributable to active portfolio management. **R-squared** represents the percentage of the portfolio's movements that can be explained by general market movements. **Upside / Downside Capture Ratio** measures a manager's ability to generate excess return above the benchmark return in up markets and retain more of the excess return in down markets. Statistics for periods less than one year are not annualized. Risk statistics are relative to the Russell 3000 Index.

Alternative Long/Short Equity

Short Duration Total Return Fund

As of June 30, 2020

OBJECTIVE

Maximize total return consistent with the preservation of capital by investing in high, medium and low-grade fixed income securities.

INVESTMENT STRATEGY

- Identify opportunities with a bottom-up intrinsic value-focused approach to active investment management and disciplined risk control.
- Perform risk/reward analysis to evaluate credit risk, interest rate risk, prepayment risk, and security structure.
- Invest in securities we believe offer attractive prospects for income and/or capital appreciation relative to the risk borne. May invest in non-benchmark sectors, specifically structured product, to generate additional yield with a strong focus on security selection.

PORTFOLIO GUIDELINES

Fund Guidelines

The Fund generally invests at least 80% of its assets in a diversified portfolio of investment grade, fixed income securities and may invest a significant portion or all of its assets in asset-backed, mortgage-related, and mortgage-backed securities. The Fund may invest up to 20% of its assets in below-investment grade securities at the time of purchase and will typically maintain an average portfolio duration of one to two, with a maximum of three.

Risk Disclosure: The value of fixed-income securities varies inversely with interest rates; as interest rates rise, the market value of fixed-income securities will decline. Lower quality debt (ie: "High Yield") securities involve greater risk of default or price changes due to potential changes in the issuer's credit quality. The value of investments in mortgage-related and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or otherwise repay their loans sooner than expected, creating an early return of principal to holders of the loans.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized.

Fund holdings, sector allocations, and portfolio statistics subject to change without notice.

The Bloomberg Barclays U.S. 1-3 Yr. Gov./Credit Index is an unmanaged index of investment grade government and corporate bonds with maturities of one to three years. This index does not incur fees and expenses (which would lower the return) and is not available for direct investment. Index data source: Bloomberg Index Services Limited. See diamond-hill.com/disclosures for a full copy of the disclaimer.

Corporate Credit Fund

As of June 30, 2020

OBJECTIVE

High current income, preservation of capital and total return over a five-year time horizon.

INVESTMENT STRATEGY

- Our primary focus is on evaluating the underlying business fundamentals and credit risk of corporate securities.
- Securities are purchased when we believe the yield and total return potential are attractive relative to asset and interest coverage and relative to other securities with comparable risk.
- We are prepared to hold securities to maturity or until they are called. However securities may be sold when price reaches our estimate of intrinsic value, to raise proceeds for a more attractive opportunity or if the underlying fundamentals deteriorate.

PORTFOLIO GUIDELINES

Fund Guidelines

The Fund generally invests at least 80% of its assets in investment grade³ and rated below-investment grade (high yield) corporate bonds, and will typically maintain an effective duration of less than five.

GROWTH OF \$10,000 SINCE INCEPTION¹

¹ The chart represents a comparison of a hypothetical \$10,000 investment and the reinvestment of dividends and capital gains in Class I shares versus the benchmark(s). The Index is unmanaged and does not incur fees. The Fund's performance is before taxes and reflects the deduction of fees and expenses.

² Investment Grade is a Bond Quality Rating of AAA, AA, A or BBB. Security quality ratings are derived from underlying portfolio securities by using the middle rating of Standard & Poor's, Moody's, and Fitch. If only two of Standard & Poor's, Moody's, and Fitch rates a security the higher of the two is selected. If only one of Standard & Poor's, Moody's, and Fitch rates a security the available rating is used. For securities that are not rated by Standard & Poor's, Moody's, or Fitch a rating from a secondary Nationally Recognized Statistical Rating Organization ("NRSRO") may be used. Ratings by any agency represent an opinion only, not a recommendation to buy or sell. Securities that are not rated by any agencies are reflected as Not Rated "NR."

An investor should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contain this and other important information about the Fund(s) and are available at diamond-hill.com or by calling 888.226.5595. Please read the prospectus or summary prospectus carefully before investing. The Diamond Hill Funds are distributed by Foreside Financial Services, LLC (Member FINRA). Diamond Hill Capital Management, Inc., a registered investment adviser, serves as Investment Adviser to the Diamond Hill Funds and is paid a fee for its services. Diamond Hill Funds are not FDIC insured, may lose value, and have no bank guarantee.

³ Cash & Other may include cash, treasuries, money market funds, and short duration fixed income funds.

⁴ Measures the interest rate risk of the Fund. It is an estimate of the approximate percentage change in the Fund's net asset value resulting from a one percentage point change in interest rates.

⁵ Measures the weighted average of all maturities of the bonds in the portfolio, computed by weighting each maturity date by the market value of the security. Interest rate fluctuations have a greater impact on the price per share of funds holding bonds with longer average lives.

LIPPER CLASSIFICATION

High Yield

Risk Disclosure: The value of fixed-income securities varies inversely with interest rates; as interest rates rise, the market value of fixed-income securities will decline. Lower quality debt (ie: "High Yield") securities involve greater risk of default or price changes due to potential changes in the issuer's credit quality.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com.

The quoted performance for the Fund reflects the past performance of Diamond Hill High Yield Fund L.P. (the "High Yield Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the High Yield Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The High Yield Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the High Yield Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 4, 2014, the inception of the High Yield Partnership and is not the performance of the fund. The assets of the High Yield Partnership were converted, based on their value on December 31, 2015, into assets of the fund prior to commencement of operations of the fund. The High Yield Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

Performance returns assume reinvestment of all distributions. Returns for periods less than one year are not annualized.

Fund holdings, sector allocations, and portfolio statistics subject to change without notice.

The ICE BofA U.S. High Yield Index tracks the performance of the U.S. dollar denominated below investment grade corporate debt publicly issued in the U.S. domestic market. This index does not incur fees and expenses (which would lower the return) and is not available for direct investment. The index data referenced herein is the property of ICE Data Indices, LLC, its affiliates ("ICE Data") and/or its third party suppliers and has been licensed for use by Diamond Hill Capital Management, Inc. ICE Data and its third party suppliers accept no liability in connection with its use. See diamond-hill.com/disclosures for a full copy of the disclaimer.

Analytics provided by The Yield Book® Software.

⁶ **Risk Statistic Definitions:** **Standard Deviation** measures the volatility of the Fund's returns. **Sharpe Ratio** uses the Fund's standard deviation and average excess return over the risk-free rate to determine reward per unit of risk. Since inception risk statistics are calculated using monthly returns beginning on the first day of the Fund's first full month of performance. Statistics for periods less than one year are not annualized. Risk statistics are relative to the ICE BofA U.S. High Yield Index.

The performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance data quoted. Investors may obtain performance information current to the most recent month-end, within 7 business days, at diamond-hill.com. Refer to each Fund on pages 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, and 29 for standard performance.

Performance returns assume reinvestment of all distributions. Returns for the periods less than one year are not annualized. The total return figures shown "With Sales Charge" reflect the maximum sales charge applicable to each class. Class I shares include performance based on Class A shares for the Small Cap Fund, Large Cap Fund, Long-Short Fund, and Corporate Credit Fund which was achieved prior to the creation of Class I shares. These total return figures may reflect the waiver of a portion of a Fund's advisory or administrative fees for certain periods. In such instances, and without such waiver of fees, the total return would have been lower.

¹ The Fund may invest in another Diamond Hill Fund. Diamond Hill Capital Management, Inc. is required to permanently waive a portion of its management fee in the pro-rata amount of the management fee charged by the underlying Diamond Hill Fund.

² There are special risks associated with small capitalization issues such as market illiquidity and greater market volatility than large capitalization issues.

³ Overall equity market risks may affect the value of the fund.

⁴ The quoted performance for the Fund reflects the past performance of Diamond Hill Global Fund L.P. (the "Global Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the Global Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The Global Partnership was not registered under the Investment Company Act of 1940 and

therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the Global Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 31, 2013, the inception of the Global Partnership and is not the performance of the fund. The assets of the Global Partnership were converted, based on their value on December 29, 2017, into assets of the fund. The Global Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

⁵ The Global Fund, International Fund, and Research Opportunities Fund invest in non-U.S. securities. Investing in non-U.S. securities may entail risk due to foreign economic and political developments; this risk may be higher when investing in emerging markets. Changes in currency exchange rates and differences in accounting and taxation policies outside the U.S. can raise or lower returns.

⁶ The quoted performance for the Fund reflects the past performance of Diamond Hill International Fund L.P. (the "International Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the International Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The International Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the International Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 30, 2016, the inception of the International Partnership and is not the performance of the fund. The assets of the International Partnership were converted, based on their value on June 28, 2019, into assets of the fund. The International Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

⁷ The Long-Short Fund and the Research Opportunities Fund use short selling which incurs significant additional risk. Theoretically, stocks sold short have unlimited risk. The

Expense Ratio includes dividend expense relating to short sales. If dividend expenses relating to short sales were excluded, the Expense Ratio for the Long-Short Fund would have been 1.08% for Class I, and for the Research Opportunities Fund would have been 1.13% for Class I.

⁸ The Long-Short Fund was long-only from inception through June 2002.

⁹ The quoted performance for the Fund reflects the past performance of Diamond Hill Research Partners, L.P. (the "Research Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects in a manner equivalent to the management of the predecessor unregistered fund. The performance of the Research Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The Research Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the Research Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from March 31, 2009, the inception of the Research Partnership and is not the performance of the fund. The assets of the Research Partnership were converted, based on their value on December 30, 2011, into assets of the fund prior to commencement of operations of the fund. The Research Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

¹⁰ The value of investments in mortgage-related and asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. The securities may decline in value, face valuation difficulties, become more volatile and/or become illiquid. They are also subject to prepayment risk, which occurs when mortgage holders refinance or otherwise repay their loans sooner than expected, creating an early return of principal to holders of the loans.

¹¹ The value of fixed-income securities varies inversely with interest rates; as interest rates rise, the market value of fixed-income securities will decline. Lower quality debt (ie: "High Yield") securities involve greater risk of default or price changes due to potential changes in the issuer's credit quality.

¹² The quoted performance for the Fund reflects the past performance of Diamond Hill High Yield Fund L.P. (the "High Yield Partnership"), a private fund managed with full investment authority by the fund's Adviser. The Fund is managed in all material respects

in a manner equivalent to the management of the predecessor unregistered fund. The performance of the High Yield Partnership has been restated to reflect the net expenses and maximum applicable sales charge of the fund for its initial years of investment operations. The High Yield Partnership was not registered under the Investment Company Act of 1940 and therefore was not subject to certain investment restrictions imposed by the 1940 Act. If the High Yield Partnership had been registered under the 1940 Act, its performance may have been adversely affected. Performance is measured from December 4, 2014, the inception of the High Yield Partnership and is not the performance of the fund. The assets of the High Yield Partnership were converted, based on their value on December 31, 2015, into assets of the fund prior to commencement of operations of the fund. The High Yield Partnership's past performance is not necessarily an indication of how the fund will perform in the future either before or after taxes.

¹⁵ The Morningstar RatingTM for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar RatingTM for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Small Cap Fund The Overall Morningstar RatingTM is based on 413 small value funds as of 6/30/20. The Fund's Class I rating was 3 stars among 413, 3 stars among 373, and 3 stars among 258 small value funds for the 3-, 5-, and 10-year periods ended 6/30/20, respectively.

Refer to performance disclosure information on page 28.

Diamond Hill Funds Calendar Year Performance (%)

Small-Mid Cap Fund The Overall Morningstar Rating™ is based on 386 mid-cap value funds as of 6/30/20. The Fund's Class I rating was 2 stars among 386, 3 stars among 346, and 3 stars among 245 mid-cap value funds for the 3-, 5-, and 10-year periods ended 6/30/20, respectively.

Mid Cap Fund The Overall Morningstar Rating™ is based on 386 mid-cap value funds as of 6/30/20. The Fund's Class I rating was 2 stars among 386 and 3 stars among 346 mid-cap value funds for the 3- and 5-year periods ended 6/30/20, respectively.

Large Cap Fund The Overall Morningstar Rating™ is based on 1,109 large value funds as of 6/30/20. The Fund's Class I rating was 4 stars among 1,109, 4 stars among 970, and 4 stars among 703 large value funds for the 3-, 5-, and 10-year periods ended 6/30/20, respectively.

All Cap Select Fund The Overall Morningstar Rating™ is based on 1,230 large blend funds as of 6/30/20. The Fund's Class I rating was 1 star among 1,230, 1 star among 1,058, and 1 star among 806 large blend funds for the 3-, 5-, and 10-year periods ended 6/30/20, respectively.

Long-Short Fund The Overall Morningstar Rating™ is based on 183 long-short equity funds as of 6/30/20. The Fund's Class I rating was 2 stars among 183, 3 stars among 141, and 3 stars among 39 long-short equity funds for the 3-, 5-, and 10-year periods ended 6/30/20, respectively.

Research Opportunities Fund The Overall Morningstar Rating™ is based on 1,230 large blend funds as of 6/30/20. The Fund's Class I rating was 1 star among 1,230 and 1 star among 1,058 large blend funds for the 3- and 5-year periods ended 6/30/20, respectively.

Short Duration Total Return Fund The Overall Morningstar Rating™ is based on 510 short-term bond funds as of 6/30/20. The Fund's Class I rating was 2 stars among 510 funds for the 3-year period ended 6/30/20.

Index data source: London Stock Exchange Group PLC. See diamond-hill.com/disclosures for a full copy of the disclaimer.

The Morningstar Global Markets Index is a net total return index designed to provide exposure to the top 97% of equity market capitalization in both developed and emerging markets. The Morningstar Global Markets ex-U.S. Index is a net total return index designed to provide exposure to the top 97% market capitalization in each of two economic segments, developed markets, excluding the United States, and emerging markets. Index data source: Morningstar, Inc. See diamond-hill.com/disclosures for a full copy of the disclaimer.

The 60%/40% blended index represents a 60% weighting of the Russell 1000 Index and a 40% weighting of the ICE BofA U.S. T-Bill 0-3 Month Index. The 75%/25% blended index represents a 75% weighting of the Russell 3000 Index and a 25% weighting of the ICE BofA U.S. T-Bill 0-3 Month Index. The ICE BofA U.S. T-Bill 0-3 Month Index is comprised of U.S. dollar denominated U.S. Treasury Bills with a term to maturity of less than 3 months.

The Bloomberg Barclays U.S. 1-3 Yr. Gov./Credit Index is an unmanaged index of investment grade government and corporate bonds with maturities of one to three years. The Bloomberg Barclays U.S. Aggregate Index is an unmanaged index representing the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through, and asset-backed securities. Index data source: Bloomberg Index Services Limited. See diamond-hill.com/disclosures for a full copy of the disclaimer.

The ICE BofA U.S. Corporate & High Yield Index is comprised of U.S. dollar denominated investment grade and below investment grade corporate debt publicly issued in the U.S. domestic market. The ICE BofA U.S. High Yield Index tracks the performance of U.S. dollar denominated below investment grade corporate debt publicly issued in the U.S. domestic market. These indices do not incur fees and expenses (which would lower the return) and are not available for direct investment. The index data referenced herein is the property of ICE Data Indices, LLC, its affiliates ("ICE Data") and/or its third party suppliers and has been licensed for use by Diamond Hill Capital Management, Inc. ICE Data and its third party suppliers accept no liability in connection with its use. See diamond-hill.com/disclosures for a full copy of the disclaimer. ICE Data was not involved in the creation of the blended indexes.

Refer to performance disclosure information on page 28.
